Innovation Living

Innovation Living is a Danish furniture company built on the proud Danish tradition of furniture design. The company has dedicated itself to designing and developing multifunctional sofa beds.

How they work on circular economy

The designs are focused on the ability to disassemble the products for recycling and the use of recyclable parts, FSC certified wood and OEKO-TEX materials and fabrics. They also recycle leftover foam from production to produce new bonded foam.

A strong and durable powder coated base in metal optimised for recycling. Detachable, washable covers in OEKO-TEX certified fabric made from recycled polyester fibres. A seat construction optimised for disassembly in a combination of FSC certified plywood, OEKO-TEX high resilient foam and OEKO-TEX recycled fiberfill. All parts are available as renewal or spare parts. Designed to lower costs and reduce CO2 emissions during transportation and storage.

DESIGN FOR CIRCULARITY

- > High quality materials; spare parts available
- > A wide choice of product varieties
- > Designed for disassembly and recycling

SOURCING MATERIALS

- > Fabrics made from recycled PET
- > Only FSC certified wood

PRODUCTION & DISTRIBUTION

- > Flatpack distribution; optimized and renewable energy

- > Regional production sites close to markets
- > 3D rendering and AR for adaption

USE

- > Easy to repair via replaceable components

RECYCLING & REUSE

- > Products can be renewed and redesigned
- > Recycled and flexible components used
