## MAKE Nordic

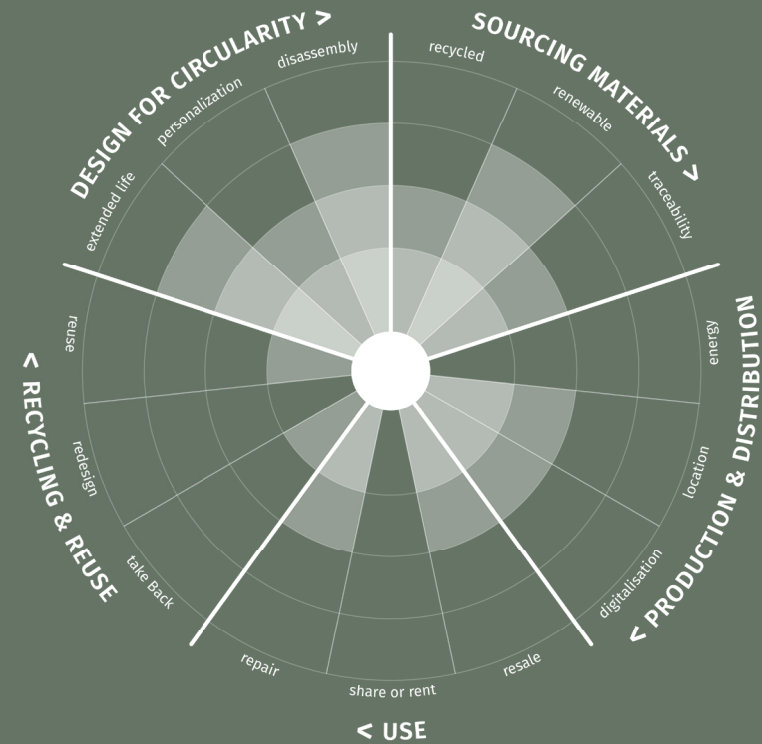

MAKE nordic was founded in 2017. It all started with an uncompromising love for architect-designed furniture and long-lasting, sustainable, quality design. The brand sells online directly to the end customer.

### How they work on circular economy

MAKE nordic has showrooms where customers can visit and get a step closer to making their interior dreams come true by getting advice on everything from interior design to the choice of fabric and experiencing the qualities. The process begins with the architects' sketches and the carpenter's details to the final destination in the customer's living room. From the selection of fabric to become a sofa. This ensures high-quality architect-designed furniture at a price where the expensive intermediaries are cut off.

The CORDYARD chairs are braided and produced in the Baltics, close to metal and cord production, meaning no unnecessary transport. The UGO stool is produced in Denmark, can be reupholstered, and uses SPOOR traceable leather.

### DESIGN FOR CIRCULARITY

- > Design and quality materials for longevity
- > Products can be customized or are multifunctional
- > Several products can be disassembled

### SOURCING MATERIALS

- > Recycled and recyclable materials
- > FSC wood and traceable leather

### PRODUCTION & DISTRIBUTION

- > Local production close to materials sourced

- > Online product configuration and digital showrooms

### USE

- > Spare parts and replacement of parts offered
- > Returned products resold or donated to charity

### RECYCLING & REUSE

- > Take back solutions
- > Scraps from own production used for pillows
