## Mogens Hansen

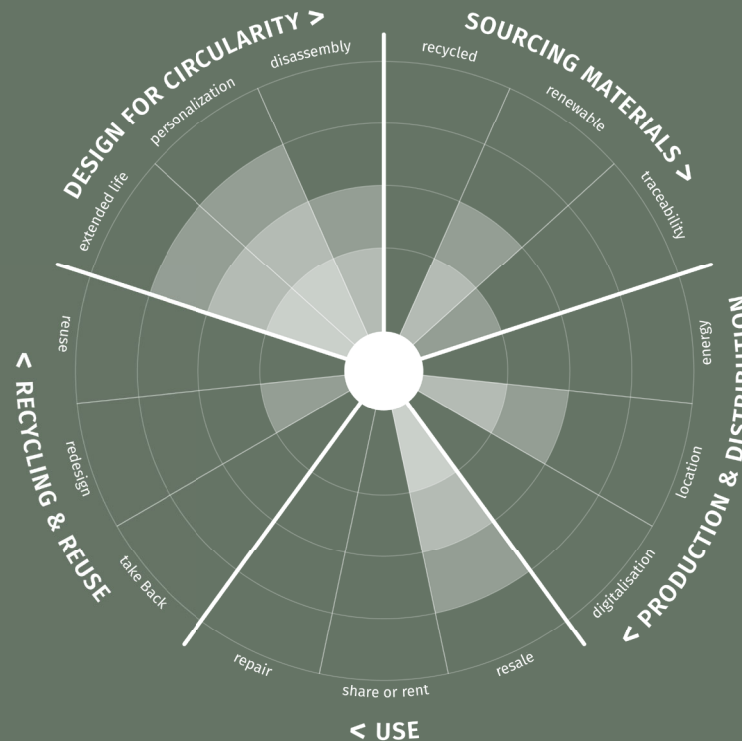

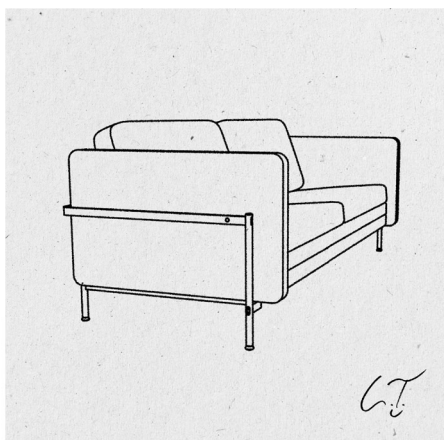

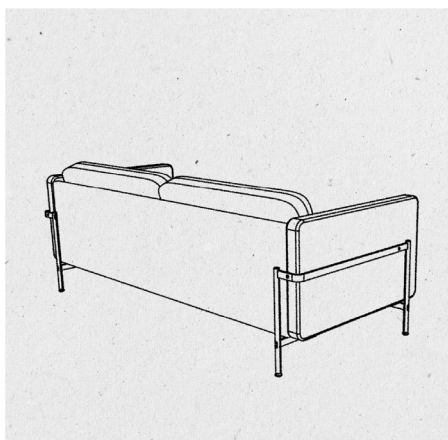

60 years of history - 60 years of experience  
- 60th anniversary - and still curious!  
Every single day at the Mogens Hansen DENMARK factory just outside Aarhus (DK), the passionate and dedicated craftsmen and -women meticulously produce high-quality furniture that suits many different generations.

### How they work on circular economy

At Mogens Hansen DENMARK, the meaning of environmental-friendly implies local production at their factory in Aarhus, Denmark - the use of local sub-suppliers and always aiming for new/updated knowledge of sustainable resources of energy, types of materials and production processes.

In realising the circular mindset, it's important for Mogens Hansen DENMARK to bring in the customer as part of the decisions taken when putting together a classic and long-lasting piece of furniture. Build on a quality frame (25 years warranty) the customers will choose cover, legs, cushions etc., leaving an environmental footprint.

### DESIGN FOR CIRCULARITY

- > High quality construction and renewable components
- > All products made to order with a variety of choices
- > Some parts replaceable and renewable

### SOURCING MATERIALS

- > FSC certified wood and organically tanned leather
- > FSC certification and CO2 footprint on selected products

### PRODUCTION & DISTRIBUTION

- > Local production and sourcing

### USE

- > Refurbishment and spare parts of relevant parts offered

### RECYCLING & REUSE

- > Redesign for existing owners offered
