## Montana

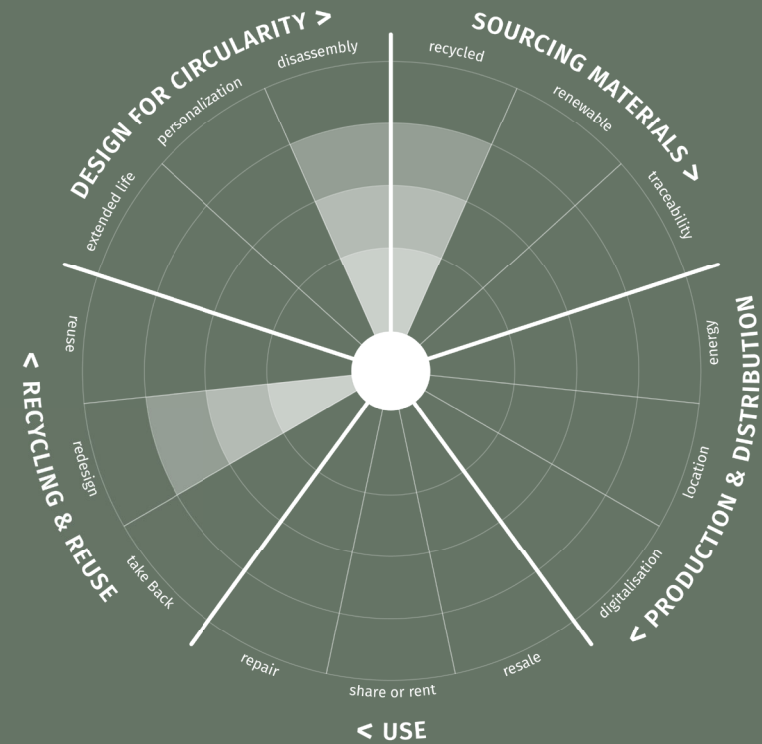

Montana Furniture is a family-owned company founded in 1982. The company is based on sustainable values and has several certifications within environment, work environment and safety. In addition, the company has been awarded the EU's official eco-label EU Ecolabel.

### How they work on circular economy

The furniture brand Montana participates in Circular Furniture Days with the Aveny-T Chair, which Anders Engholm Dohn has designed for Aveny-T Teater. In February, the chair won the TV-program 'Denmark's next classic', and Montana is responsible for the production of 100 copies of the chair for the theater.

In the words of the judges, Anders Engholm Dohn has created a classic for the Danish people with a strong starting point in sustainability, as the seat and back are made of recycled plastic collected from households, companies and nature. The chair will be part of Montana's collection of chairs from designers such as Verner Panton, Jørgen Rasmussen and Jens Martin Skibsted.

### DESIGN FOR CIRCULARITY

> Only two easily separated materials used

### SOURCING MATERIALS

> Shell made of recycled plastic only  
> ECO Label, securing documentation of origin of materials
