TAKT

TAKT is a furniture company rethinking the way to design, build and sell furniture. The brand believes in bringing high-quality design to more people in revolutionary, sustainable and transparent ways.

How they work on circular economy

With a rigorous design-led approach, TAKT seeks to impact all product lifecycle stages with a radical and positive disruption. TAKT shares the climate impact of all their products as the next step in its tireless effort to be a driver of positive change. All products are already consistently certified with the EU eco-label and as a corporation, TAKT has been certified as a B-Corp.

TAKT looks to the future with their sights set far beyond furniture. Because the brand believes that society needs new ideas on making quality goods accessible to more people, they find it essential to do it in a sensible way that doesn't adversely affect life on the planet.

DESIGN FOR CIRCULARITY

- > Products easily repaired by replaceable components
- > Variety of fabrics and colours
- > All products and parts easy to disassemble and replace

SOURCING MATERIALS

- > FSC certified wood and ECO labelled materials
- > Certifications and CO2 footprint on select products

PRODUCTION & DISTRIBUTION

- > All surplus and leftover materials used for products or warming
- > Local and regional production
- > 3D rendering

USE

- > All product easy to repair and care kit offered
