Wabi Sabi Nordic

Wabi Sabi Nordic is a Danish natural stone interior brand founded by Stine Rosgaard. More than 50% of their material is upcycled. Wabi Sabi's motivation is to combine aesthetics and material to create timeless surroundings made to last.

How they work on circular economy

When large pieces of stone are cut from the quarry, smaller or slightly damaged pieces were formerly discarded. Wabi Sabi Nordic encourages minimal waste by upcycling this material. Their production is personalised, the stones are from Europe and Turkey, and the designs are made to last.

Wabi Sabi Nordic's dining table Solar involves a circular aesthetic and a circular economy. The table's beautiful base is made from upcycled cutting waste of the marble Montagna.

DESIGN FOR CIRCULARITY

- > Robust and long-lasting materials and timeless design
- > Customization offered, products made to order

SOURCING MATERIALS

- > Cut-off materials and waste used

PRODUCTION & DISTRIBUTION

- > Packaging made of recycled or biodegradable materials
- > 3D rendering

USE

- > Customers instructed in maintenance and care
