## Censuum

Censuum is a new type of department store featuring responsible, innovative and exciting Danish brands, stories and events. More than +40 brands can be purchased directly in the store or online. Censuum is set out to democratise physical retail access.

### How they work on circular economy

All the carefully selected brands at Censuum have a responsible profile and are chosen based on criteria within three focus areas; Material & Circularity, Climate & Environment and Social Responsibility.

At Censuum you can experience multiple brands with a responsible way of thinking: Bathing suits made out of old fishnets, shoes made from fish leather, children's shoes made to order to minimise overproduction, jackets made of chemically tested Oeko-tex certified materials, and other styles made of 100% recycled plastic. Censuum describes their work as being on a responsible journey, taking small daily steps to improve. Censuum represents the categories: Apparel, Home, Beauty and Kids.
