

More than Responsible Textiles

About us

Sustainability-oriented, vertically-integrated manufacturer of knitted textile products since 1997, Pratibha aims at creating organic relationships across the value chain. Pratibha connects 25,000 farmers, 6500 employees and apparel brands from over 20 countries.

Apart from manufacturing cotton, fibers, fabrics and apparel, Pratibha Syntex is also engaged in social initiatives to generate employment for rural women.

“A paradigm shift in the way garments are designed & produced, reinforcing synergy between People & Planet”

**PSL is Committed
to SDG 2030**

Planet Goals

BECOME WATER NEUTRAL & WATER POSITIVE

Save 12Cr Liters of Water by 2025. To save 20,000 families' annual water consumption (family of 4) by 2025. Become Water Positive by 2030

TO USE 50% RENEWABLE ENERGY BY @2025 & 100% BY 2030

To save 7500 families annual electricity consumption(family of four). To reduce 20% normalized energy consumption.

TO REDUCE 90% OF LANDFILL WASTE BY 2025 AND 100% BY 2030.

1000 MT less burden on landfill.

TO USE 100% SUSTAINABLE PRODUCTS 2025

TO REDUCE 80% OF GREENHOUSE GASES EMISSION

Equivalent to the plantation of 9 million trees by 2025 & Become Carbon Neutral by 2030

People Goals

PROVIDING SCHOLARSHIP

To tie up with all leading institutions providing opportunities for all children of employees for quality education and growth – 2025

ALL EMPLOYEES

will own their individual houses. – 2030

GYANPEETH

Training center for Talent growth and promotion -2025

HEALTHCARE

To support healthcare for all employees and communities in 2030

50% OF THE WORKFORCE IN PRATIBHA COMPRISES OF WOMEN -2025

were gifted to employee for Free

#Climatechange

Changes for the Climate

Carbon & Energy

35,62,678 Kwh of energy saved

since 2016 is equivalent to 3500 families annual electricity consumption

- 30% of Solar Power; Additional 5.5mw by July 2022.
- 15 % Reduction in Power Consumption
- Carbon Sequestration :Planted 300,000 +Trees , ROC Farm initiative
- Alternative Fuel: Using Biomass Briquette
- 15% reduction in GHG

Water

1,72,48,000 ltr of water saved
since 2016 is equivalent to around 34,496 families annual water consumption

- 100 % Water Recycle & Re use
- Zero Liquid Discharge
- 100 % Biological ETP
- Rainwater Harvesting
- STP Recycle Water used in different processes

Landfill

67 % reduction in landfill waste

Chemistry

- 100% ZDHC MRSL Compliant Version 2
- Zero Liquid Discharge
- Higg FEM 3.0

Sustainable Range

Cradle to cradle

Circularity

Source Materials which
you will be proud of

Certified to

Allure – Sustainable Viscose

Plant : FSC Certified , Canopy

Pulp : 99% Solvent , Rain Forest Certified

Plant : 4 week Delivery

Yarn : Vortex Spinning , low pilling

Pallet : 32 Colour core Pallet

Fabric : 100% GOTS Approved , C2C certified ,
Good color fastness & Performance

Fiber : Minimum Fiber Loss

Fashion : Comfortable Clothing , good drape

LOOP – Recycle Range

Reduces emissions saves fuel

Low carbon Footprint

Uses Less water in production

Costs 50% less than alternatives

Highest PET recycling rate globally

7 Million People economically associated with Indian PET industry

10 Million+ garments & home textile made

90% PET BOTTLES PRODUCED IN INDIA ARE RECYCLED.

100 crore+ garments & home textiles in India are made from recycled PET bottles

Over 70 lakh people are economically associated with Indian PET industry directly or indirectly, supporting circular economy

PET is safe. PET contains NO BPA, phthalates or heavy metals. It has NO endocrine disruptors and is non-carcinogenic. (Report from CFTRI - A CSIR Institute)

PET IS ECO-FRIENDLY WITH LOW GLOBAL WARMING POTENTIAL (GWP)

PET is lightweight. Reduces emissions, saves fuel.

Low Carbon footprint vis-à-vis alternatives. Greener & eco-friendly.

Uses less water in production and through the value chain. Preserves scarce natural resource.

Costs 50% less vis-à-vis alternatives.

India has one of the highest PET recycling rates globally

(Disclaimer: The actual representation of the map of India does not purport to be the political map of India.)

PET IS A WONDER MATERIAL. IT IS SAFE, ENVIRONMENTALLY FRIENDLY AND THE MOST WIDELY RECYCLED PACKAGING PRODUCT IN INDIA.

PACE is committed to recycling.
